

TECHNICAL SUPREMACY SETS BYBOXES APART:

2256
A simple, user-friendly solution that meets the challenges of modern postal delivery.

ByBox has launched a new generation of electronic postal lockers that are not only available in a variety of sizes and configurations to meet every requirement; but also packed with technical innovation to make them extremely flexible, user-friendly and secure.

The result is a reliable, robust and readily accessible system that is proven

to provide postal operators and their customers with new levels of service, and swift delivery and collection facilities that meet the changing needs of the postal market.

Equally suitable for internal and external use, each locker bank is flexible and can be easily changed by adding or removing a column of locker doors. Built with tough, environmentally resistant material and coated in vandalism resistant paint, they operate over

a large temperature range and at up to 93% humidity. To protect customers from the elements, external locker banks can be fitted with a weatherproof canopy.

Lockers are available in several standard dimensions that handle everything from large parcels to letters, and sizes can be customised if required. They can also be supplied in a variety of colours and branded to aid customer identification.
