

ByBox logs Telent deal

2256

Overnight parts delivery company ByBox has won a three-year £2m (€2.9m) contract from telecoms group Telent.

Telent uses ByBox's distribution network and box banks to service its 500-strong contingent of engineers. ByBox is also hosting a website that allows Telent's engineers to order parts.

● ByBox is testing a new generation of RFID-enabled box banks that should be ready to use by the end of the year. The embedded RFID capability provides a real-time audit of all RFID-tagged parts in the door of every unit and enables customers to "see" each item as it moves through ByBox's operation.
