Praise for 2256 innovators

OVERNIGHT parts distribution firm ByBox, which has a depot in Bentley, Doncaster, has been praised at two business awards ceremonies.

The company was highly commended in the International Freight-ing Weekly Awards (IFW) 2007 for its entry in the Business Improvement Award category.

It's the second time in a row for ByBox, which won the award in 2006.

The company also reached the final of the Motor Transport Awards for its entries in the Network of the Year and Partnership categories.

And it made the top three in the Innovation Award category of the IFW awards.

ByBox had a turnover of more than £20 million in 2006 and is on course to increase that to £28 million this year.
